

# Programs and Projects Delivery System

---

The Programs and Projects Delivery System (PPDS) is a World Wide Web-based information source. It allows anyone with a web browser to view data regarding the progress of work performed by any Division/District of the US Army Corps of Engineers for its varied customer base. It provides current and detailed data regarding projects at all Divisions within the Corps of Engineers. Additionally, the PPDS contains links to the various individual web pages maintained by separate units within each District.

## PPDS WEB SITE

The web address shown at the top of this page takes you directly to the PPDS home page. Here you will find a United States map with Division boundaries outlined. Simply click within a boundary to go to that Division's PPDS home page. Additionally, the leftmost frame contains standard text-link navigation to these Divisions.

Each Division's PPDS home page includes a circular graphic representing each of the Districts within that Division. Again, the leftmost navigation frame contains text links to these Districts. Clicking either the castle on the circular graphic or the District's name in the navigation frame will take you to a map showing that District's boundaries.

Below the District boundary map you will see activity links designated as *Military*, *Civil*, *Environmental*, and *SFO* (Support for Others). These links take you to a map showing the boundaries and project location names for that activity. Additionally, there is a link that will take you directly to the Division's PPDS home page.

## NAVIGATION FRAME

On the leftmost side of a District's PPDS home page is a navigation frame consisting of six categories containing many links to other sites. They are:

[Home](#) - Provides access to that District's web page. (Not to be confused with the PPDS home page.)

[District Projects](#) - Provides access to the same activities that are offered under the District map on the right.

[Standard Reports](#) - Provides access to local Command Management Review and Project Review Board reports.

[Expertise Database](#) - Provides access to various Centers of Expertise information.

Corporate Reports - Provides access to such things as:

*Reports:*

- Project Reports
- USACE Command Management Review Reports
- Program Reports
- CEFMS Reports
- PROMIS Command Management Review
  - MILCON Design Program (Appropriation & FY Workloads)
- HQ PROMIS PM Module Reports

*Links to:*

- HQ PROMIS home page
- WES PROMIS home page
- NWP-PM web site
- CERFER
- Nashville District CEFMS Reports
- CEFMS Information
- RMS Information

Dept of Army - Provides access for reviewing solicitation information.

## PROJECT DATA SHEET

The Project Data Sheet contains a great deal of information about a specific project. This information is arranged in sections: Heading, Other Database Links, General Project Information, Design Data, Construction Data, Project Team Members, and Photos.

## SELECTING A PROJECT FOR DISPLAY

To view a specific *Project Data Sheet*, choose a **Division**, choose a **District**, choose an **activity** (military, civil, etc.), choose a **project location**, and choose a **project** (listed in the middle of the window). The Project Data Sheet will be displayed.

## NAVIGATING A PROJECT DATA SHEET

In the **Heading** is the date of the information included in this data sheet. The **Other Database Links** section provides access to detailed data extracted from databases and applications such as PROMIS, CEFMS, and RMS. The **General Project Information**, **Design Data**, and **Construction Data** sections provide detailed project information. The **Project Team Members** section provides information about the members of the project team. The **Photos** section includes photos, drawings and specifications for that project.
